THEIR CHALLENGE

Enterprise technology deployment initiatives and extensive merger and acquisition activity forced this customer to retain native data while sunsetting specific applications and systems. The client required an agnostic solution to archive, access, and present clinical/nonclinical, discrete/non-discrete data in one compliant and secure platform. Looking for a forward-thinking solution that prioritized efficiency without elevating workload, the client had a multi-faceted need to make collecting, storing, and utilizing their data both easy and reliable.

M+A Activity

Old Applications/Systems

Terabytes of Data

OUR SOLUTION

Clearsense's wide range of solutions retired hundreds of applications with high maintenance costs, creating efficiency for the organization both in employee hours and cost savings.

By simplifying the client's complicated process of parsing, understanding, and implementing data relevance, our client can now leverage data from disparate systems across the organization. This hyper-flexible tool, combined with Clearsense's data-first approach, eliminates assumptions and creates a clear path to transparency and truth. Our innovative data management best practices and cutting-edge, intelligent, automated, secure, and scalable platform transformed how the organization leverages its data—one step at a time.

After all, data is your greatest asset and if your organization is relying on outdated methods to store and archive your legacy data, you aren't empowering better decision-making. **Start today.**

Here are three ways to put Archive & Access to work for your organization:

Prepare legal, medical records and aggregate data across any archived legacy system, delivering intuitive, elastic search capabilities to support faster results

Offer your team a flexible, unified report viewer for images, tabular reports, and dashboard visualizations

Accelerate applications for many common EHRs, ERPs, and ancillary systems, providing a direct integration with live applications through SSO and patient contextual links

GET TO KNOW US

Committed to leading transformation in healthcare, ClearSense® creates a data journey, all the way from number to key insight. Cloud-based, AI-enabled, and HITRUST-certified, the platform of data solutions ensure data governance, implementation, and analytics are rapidly mainstreamed while remaining scalable and secure. Driving faster outcomes in clinical, financial, and operational environments, ClearSense is powering the innovation of tomorrow—right now. Learn more at ClearSense.com.

THE CLEARSENSE PROMISE

OUR MISSION

Our mission is to unlock the full potential of healthcare data by delivering flexible solutions that empower data confidence and enable data-driven decision-making to achieve better outcomes.

OUR VISION

We have created a holistic data environment with processes to cleanse, normalize, harmonize, and integrate better data with tools to make it more manageable, accessible, and valuable. We are unlocking the potential of data from patient care decisions, business operations, financial routines, and research.

WHY CHOOSE CLEARSENSE?

One Platform, One Partner

One partner with an advanced end-to-end platform that empowers executives, business owners, clinicians, IT, and data scientists.

Data First Approach

Eliminates assumptions and replaces them with a single source of trusted data. Put trusted data into action without barriers or fear.

Healthcare Focused

We are 100% focused on the healthcare industry, which means we understand your data challenges and opportunities.

Security

Multi-cloud, HITRUST certified, HIPAA and SOC 2 compliant with SSO Integration. Role-based security controls at the application and data levels. We treat security with the highest level of importance.

Data Quality & Trustworthiness

Data governance advisory services wrapped around AI technologies and processes ensure the highest level of data trustworthiness.

Your Data. **Protected.**

ClearSense®
