Application Rationalization and Archiving
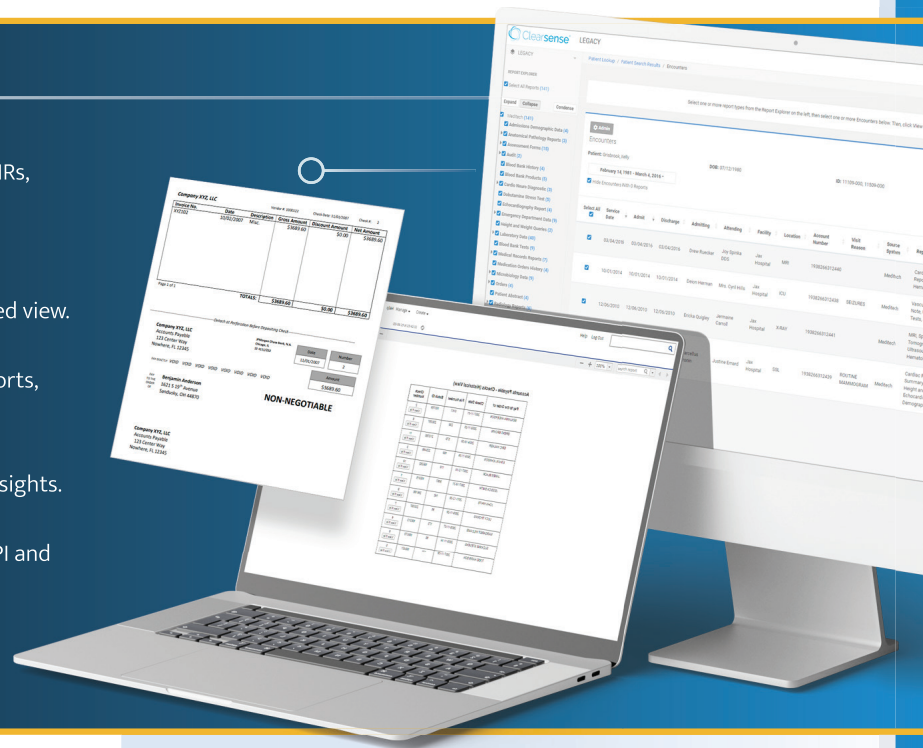

Clearsense®

In today's healthcare environment, organizations strive to optimize operational efficiency, lower costs, and improve data integration. Application rationalization and archiving play a vital role in streamlining the application landscape, involving assessing, organizing, and optimizing applications and data. With 1Clearsense, identifying redundant, outdated, or underutilized applications becomes efficient, leading to accelerated application decommissioning through comprehensive data management and aggregation.

Through the application rationalization and archiving functions of 1Clearsense, your organization's legacy data is seamlessly integrated from disparate sources across the enterprise into a single, integrated view. 1Clearsense offers healthcare systems the unique power to keep raw data compliant, accessible, searchable, and valuable for future insights in a cloud-agnostic environment with minimal IT effort. It also integrates with live applications through EMPI and patient contextual links.

How Clearsense Helps

- Accelerate application decommissioning for many common EHRs, ERPs, and ancillary systems while making the data available in production systems.

- Aggregate data from disparate systems into a single, integrated view.

- Deliver a flexible, unified report viewer for images, tabular reports, and dashboard visualizations.

- Keep raw data compliant, accessible, and valuable for future insights.

- Provide a direct integration with live applications through EMPI and patient contextual links.

Benefits

- Quickly decommission legacy clinical and operational systems, saving millions by eliminating recurring, annual licensing costs.

- Prepare legal, medical records and aggregate data across any archived legacy system, delivering intuitive, elastic search capabilities to support faster results.

- Consolidate legacy data into a single, intuitive platform for easy access.

- AD-based access permissions and restrictions.

- Customized views, quick filters, and keyword search capabilities.

The Clearsense Approach

1Clearsense, an all-in-one healthcare data platform, aggregates data from various sources and is powered by the Clearsense Healthcare Data Model. This model offers pre-built integrations and accelerators to rapidly implement connections, mapping, and data quality rules, ensuring data lineage and traceability. With payer and provider data residing within the common healthcare data model, organizations can determine the source of truth and assign trust rules. Collaborating with organizations, Clearsense establishes granular data access policies and assigns security controls. Accessible data can be seamlessly utilized in 1Clearsense analytics, outgoing integrations, and customized applications through 1Clearsense's bring-your-own-tool (BYOT) capabilities.

Get To Know Us

Committed to leading transformation in healthcare, Clearsense® creates a data journey, all the way from number to key insight. Cloud-based, AI-enabled, and HITRUST-certified, the platform of data solutions ensure data governance, implementation, and analytics are rapidly mainstreamed while remaining scalable and secure. Driving faster outcomes in clinical, financial, and operational environments, Clearsense is powering the innovation of tomorrow—right now.

The Clearsense Promise

Our Mission
Our mission is to unlock the full potential of healthcare data by delivering flexible solutions that empower data confidence and enable data-driven decision-making to achieve better outcomes.

Our Vision
We have created a holistic data environment with processes to cleanse, normalize, harmonize, and integrate better data with tools to make it more manageable, accessible, and valuable. We are unlocking the potential of data from patient care decisions, business operations, financial routines, and research.

Why Choose Clearsense?

One Platform, One Partner
One partner with an advanced end-to-end platform that empowers executives, business owners, clinicians, IT, and data scientists.

Data First Approach
Eliminates assumptions and replaces them with a single source of trusted data. Put trusted data into action without barriers or fear.

Healthcare Focused
We are 100% focused on the healthcare industry, which means we understand your data challenges and opportunities.

Security
Multi-cloud, HITRUST certified, HIPAA and SOC 2 compliant with SSO Integration. Role-based security controls at the application and data levels. We treat security with the highest level of importance.

Data Quality & Trustworthiness
Data governance advisory services wrapped around AI technologies and processes ensure the highest level of data trustworthiness.
