

FOR PROVIDERS

# Provider Data Management

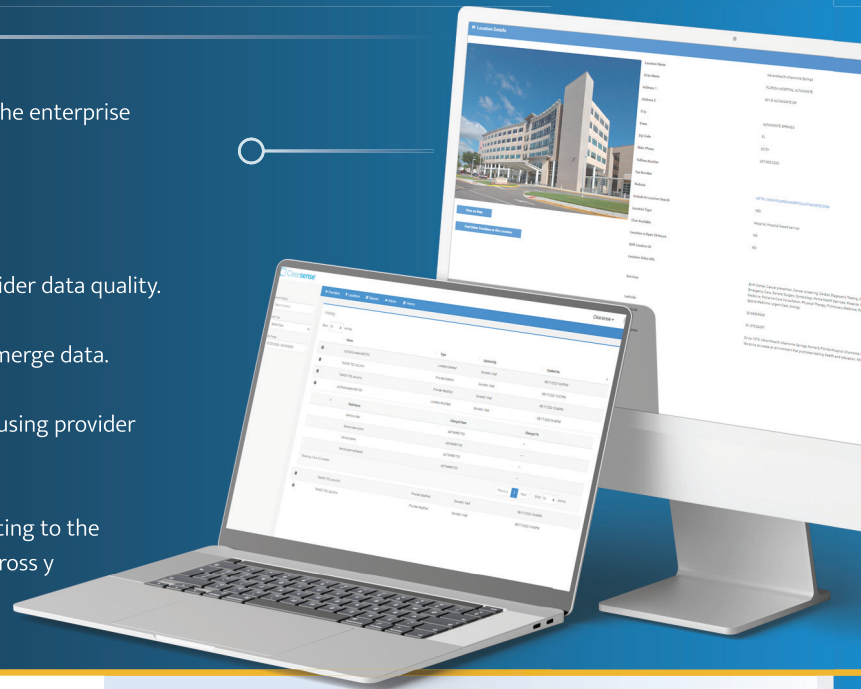

In healthcare organizations, provider data originates from various sources, including the Electronic Medical Record (EMR), credentialing systems, Enterprise Resource Planning (ERP) systems, and more. Typically, these data sources are managed and updated by different departments within the organization, resulting in a lack of standardized organization, sharing, or consistency across various systems and operational areas. To address these challenges, organizations must undertake the task of aggregating and consolidating this diverse data. It's imperative to validate the quality of key attributes, such as identities and credentials. Once this trusted data is established, it can be leveraged organization-wide to enhance operational efficiency, facilitate reporting, and inform decision-making processes.

Gone are the days of belief in a "single" source of truth. The reality is that multiple definitions of "truth" or appropriate context or high-quality data are needed by use case. Provider data that is critical to display on a patient directory to comply with the No Surprises Act may differ from the provider data needed for credentialing and claims submission. Organizations must be agile in understanding their data, define sources of truth by use case, and put that data to work. 1Clearsense empowers organizations to optimize data integrity for external reporting and improve financial operations through accurate provider data management.

## How Clearsense Helps

- ✓ Identify and resolve data errors in applications and sources across the enterprise with a comprehensive and transparent view of the data.
- ✓ Ensure compliance with regulations.
- ✓ Increase revenue growth by reducing claims denials related to provider data quality.
- ✓ Inspect data and identify opportunities to standardize, cleanse, or merge data.
- ✓ Apply context, intelligence, and automation to business workflows using provider data, metadata, and connected data sources.
- ✓ Gain transparency and comparison across all data sources contributing to the source of truth to empower trust and data quality improvement across your entire data ecosystem.

## Benefits

- ✓ A data domain-driven approach that allows organizations to support aggregating diverse data sets into customer-defined provider data fields.
- ✓ Creation of an enterprise-wide golden record of core provider data.
- ✓ User-friendly, role-based access to view and contribute to the curated source of truth.
- ✓ Future-proofed microservices architecture and data democratization philosophy to support flexible use of data.
- ✓ Robust data source ingestion (RDBMS, CSV, Flat File, API) and outgoing integration (API, HL7, FHIR) with healthcare standards in mind.

## The Clearsense Approach

1Clearsense, an all-in-one healthcare data platform, aggregates data from various sources and is powered by the Clearsense Healthcare Data Model. This model offers pre-built integrations and accelerators to rapidly implement connections, mapping, and data quality rules, ensuring data lineage and traceability. With payer and provider data residing within the common healthcare data model, organizations can determine the source of truth and assign trust rules. Accessible data can be seamlessly utilized in 1Clearsense analytics, outgoing integrations, and customized applications through 1Clearsense's bring-your-own-tool (BYOT) capabilities.

## Get To Know Us

Committed to leading transformation in healthcare, ClearSense® creates a data journey, all the way from number to key insight. Cloud-based, AI-enabled, and HITRUST-certified, the platform of data solutions ensure data governance, implementation, and analytics are rapidly mainstreamed while remaining scalable and secure. Driving faster outcomes in clinical, financial, and operational environments, ClearSense is powering the innovation of tomorrow—right now.

## The ClearSense Promise

### Our Mission

Our mission is to unlock the full potential of healthcare data by delivering flexible solutions that empower data confidence and enable data-driven decision-making to achieve better outcomes.

### Our Vision

We have created a holistic data environment with processes to cleanse, normalize, harmonize, and integrate better data with tools to make it more manageable, accessible, and valuable. We are unlocking the potential of data from patient care decisions, business operations, financial routines, and research.

## Why Choose ClearSense?

### One Platform, One Partner

One partner with an advanced end-to-end platform that empowers executives, business owners, clinicians, IT, and data scientists.

### Data First Approach

Eliminates assumptions and replaces them with a single source of trusted data. Put trusted data into action without barriers or fear.

### Healthcare Focused

We are 100% focused on the healthcare industry, which means we understand your data challenges and opportunities.

### Security

Multi-cloud, HITRUST certified, HIPAA and SOC 2 compliant with SSO Integration. Role-based security controls at the application and data levels. We treat security with the highest level of importance.

### Data Quality & Trustworthiness

Data governance advisory services wrapped around AI technologies and processes ensure the highest level of data trustworthiness.
