

Trusting the Data:

Large Distributed Healthcare System Taps Into a Single Source of Truth for Provider and Location Data

Learn how a large distributed healthcare system helped staff regain trust in their provider and location data and gave their team the power to pursue powerful outcomes related to referral management, market analysis, and patient retention. It's also the story of how Clearsense purpose-built a data-driven solution that aggregated, governed, and presented a single, rich data set for end-user consumption.

BY THE NUMBERS

- Leading health care system with 4K+ providers
- 11 Hospitals, 150+ clinic locations
- One of the largest faith-based, non-profit health systems in the US
- Recently integrated health system to total more than 300 care sites

DATA SOURCES

- Provider Credentialing System
- Marketing department's provider database
- Patient Access team's excel spreadsheet
- Healthcare system network rosters

THE CHALLENGE

Like most healthcare organizations, managing continuous provider and location information changes can be overwhelming. Maintaining a holistic, accurate view of the data in one system is a full-time job in and of itself. Introducing 5, 10, or 20 additional parallel data sources across multiple locations results in near impossible maintenance.

That said, this data powers day-to-day operations by informing clinicians, patient access staff, marketing, patients, and other key stakeholder groups. Healthcare organizations can't afford to provide incorrect information to key stakeholders, nor should they miss out on the opportunity to fully leverage this information to optimize future decision-making.

Our client needed a solution that could:

Provide staff with immediate, customized access to a single source of truth for reference purposes.

Provide complete trust in the consolidated provider and location data set's accuracy via initial governance and iterative updates.

Empower stakeholders with powerful data-driven outcome potential, such as patient leakage reduction and referral workflow optimization.

GET TO KNOW US

Committed to leading transformation in healthcare, ClearSense® creates a data journey, all the way from number to key insight. Cloud-based, AI-enabled, and HITRUST-certified, the platform of data solutions ensure data governance, implementation, and analytics are rapidly mainstreamed while remaining scalable and secure. Driving faster outcomes in clinical, financial, and operational environments, ClearSense is powering the innovation of tomorrow—right now. Learn more at ClearSense.com.

THE CLEARSENSE PROMISE

OUR MISSION

Our mission is to unlock the full potential of healthcare data by delivering flexible solutions that empower data confidence and enable data-driven decision-making to achieve better outcomes.

OUR VISION

We have created a holistic data environment with processes to cleanse, normalize, harmonize, and integrate better data with tools to make it more manageable, accessible, and valuable. We are unlocking the potential of data from patient care decisions, business operations, financial routines, and research.

WHY CHOOSE CLEARSENSE?

One Platform, One Partner

One partner with an advanced end-to-end platform that empowers executives, business owners, clinicians, IT, and data scientists.

Data First Approach

Eliminates assumptions and replaces them with a single source of trusted data. Put trusted data into action without barriers or fear.

Healthcare Focused

We are 100% focused on the healthcare industry, which means we understand your data challenges and opportunities.

Security

Multi-cloud, HITRUST certified, HIPAA and SOC 2 compliant with SSO Integration. Role-based security controls at the application and data levels. We treat security with the highest level of importance.

Data Quality & Trustworthiness

Data governance advisory services wrapped around AI technologies and processes ensure the highest level of data trustworthiness.

Your Data. **Protected.**
