

DATA GOVERNANCE & LITERACY

Better data is everyone's job

Meet the most comprehensive and agile data governance service in the industry.

Bad data costs U.S. companies three trillion dollars per year, according to IBM. A study by Gartner has found that most organizations surveyed estimate they lose \$14.2 million dollars annually.

For many healthcare organizations, the demand for information and analytics continues to exceed the supply of skilled resources and accessible, well-defined, high-quality data sets that place the power of data in the hands of every employee. As the complexity and volume of data continue to grow exponentially and the gap between the demand for information and the supply of analytics resources expands, implementing self-service analytics is essential to business continuity and agility. Data Governance provides the definitions, harmonization, lineage, and data use guidelines required for self-service analytics.

The ClearSense data-first approach enables organizations to:

- Deploy a holistic data governance program providing enterprise approaches to the management of master & reference data, data quality, metadata, data policy, data stewardship, and analytics governance
- Clearly define data-related decision rights and accountabilities across the business
- Make self-service analytics a reality by reducing the dependency on phone a friend and knowing an expert
- Implement a coordinated balance between centralized, localized, and self-service analytics
- Reduce backlogs of requests for data, reports, and dashboards to focus on improving data delivery turnaround

Are you ready to manage your data as a strategic asset?

With a formalized enterprise approach to data governance, your organization will enable knowledge sharing, reduce duplication of analytics efforts, and increase the reuse of previously researched and resolved data challenges. ClearSense is responding to the diversity in data governance maturity across healthcare by:

- Introducing the market to a consumption-based pricing model that significantly minimizes cost while obtaining measurable value from each advisory hour
- Offering unique custom advisory services designed to address your specific culture, resources, and desired rate of change
- Providing continuous guided action focused on scale, sustainability, and operationalizing a strategic business function beyond initial projects
- Collaborating in engaging sessions with external peers which invite discussion and coaching
- Coaching to apply basic asset management capabilities to data, resulting in the elevation of data literacy, confidence, and abilities of your internal resources
- Supplying a step-by-step roadmap of mature repeatable processes and program assets. Our method uses existing resources and technology

Are you ready to align with HIMSS AMAM requirements and DAMA-DMBOK Best Practices for data management?

GET TO KNOW US

Committed to leading transformation in healthcare, ClearSense® creates a data journey, all the way from number to key insight. Cloud-based, AI-enabled, and HITRUST-certified, the platform of data solutions ensure data governance, implementation, and analytics are rapidly mainstreamed while remaining scalable and secure. Driving faster outcomes in clinical, financial, and operational environments, ClearSense is powering the innovation of tomorrow—right now. Learn more at ClearSense.com.

THE CLEARSENSE PROMISE

OUR MISSION

Our mission is to unlock the full potential of healthcare data by delivering flexible solutions that empower data confidence and enable data-driven decision-making to achieve better outcomes.

OUR VISION

We have created a holistic data environment with processes to cleanse, normalize, harmonize, and integrate better data with tools to make it more manageable, accessible, and valuable. We are unlocking the potential of data from patient care decisions, business operations, financial routines, and research.

Are You Ready to See Your Data More Clearly?

WHY CHOOSE CLEARSENSE?

One Platform, One Partner

One partner with an advanced end-to-end platform that empowers executives, business owners, clinicians, IT, and data scientists.

Data First Approach

Eliminates assumptions and replaces them with a single source of trusted data. Put trusted data into action without barriers or fear.

Healthcare Focused

We are 100% focused on the healthcare industry, which means we understand your data challenges and opportunities.

Security

Multi-cloud, HITRUST certified, HIPAA and SOC 2 compliant with SSO Integration. Role-based security controls at the application and data levels. We treat security with the highest level of importance.

Data Quality & Trustworthiness

Data governance advisory services wrapped around AI technologies and processes ensure the highest level of data trustworthiness.

Your Data. **Protected.**

ClearSense®
