# THE ROI OF Legacy Data

Legacy data, when accessible, can change patient lives and the decisions made by an organization. A lack of data is hurting staffing, capacity, and so much more in global healthcare environments.

According to Becker's Hospital Review, healthcare companies have seven main fears about cloud data

LACK OF DATA INTEROPERABILITY

TRUST

REGULATIONS

TALENT POOL

DATA INSECURITY

BUDGET

CULTURE

> Healthcare groups have been slower to adopt and digitally transform their organizations due to massive technical debt and coming out from under legacy applications and infrastructure.

TRACY WOO
FORRESTER SENIOR ANALYST

83%

of Healthcare Systems have Outdated Software

(PCMag, 2020)

Here's a hard truth:

As data sources increase and legacy systems are replaced, data retention, compliance, and security risks become more complex. Most organizations struggle with basic data visibility and access to siloed data, leaving stakeholders frustrated and constrained.

What can archiving legacy data do for your organization?

SAVE Gain immediate ROI by reducing costs of legacy application maintenance fees

SIMPLIFY Consolidate old data in one easy-access, cost-effective cloud solution

SECURE Meet legal data storage requirements with granular, AD-based access permissions and restrictions

SEARCH Make it easier for users to find what they need quickly

SCALE Do more with your legacy data by enabling analytic discoveries as your data maturity evolves

30%

of all global data is healthcare data; the average individual produces a whopping 270 gigabytes of health data per year.

(RBC Capital Markets)

Did you know?

From historical legal and medical records to operational reports, Archive + Access quickly ingests data from any source and makes it easy for your team to view, search, and analyze legacy data from any archived system in a user-friendly, consumer-grade interface.

Learn how a large, nationally recognized not-for-profit health integrated delivery network decommissioned 200+ systems for an annual cost savings, so far, of $23M.
