# Provider Data and Network Management

Clearsense®

Payers manage various applications related to network management, provider credentialing, contracting, care delivery, claims processing, and prior authorizations. These applications are typically used by various operational departments and staff and maintained by multiple IT resources. Unfortunately, this often results in fragmented data with limited quality control and questionable sources of truth. As a result, payers face challenges in maintaining accurate provider information, impacting claims payment, care gap closure, and provider attribution. Inaccurate and inconsistent provider data also affects members who struggle to find suitable providers or schedule services. In response to these common challenges, CMS has introduced measures such as timely provider roster updates and the implementation of provider directory APIs as part of the 2026 Proposed Rule, emphasizing the importance of accurate and up-to-date provider information.

The Clearsense Approach

1Clearsense, an all-in-one healthcare data platform, aggregates data from various sources and is powered by the Clearsense Healthcare Data Model. This model offers pre-built integrations and accelerators to rapidly implement connections, mapping, and data quality rules, ensuring data lineage and traceability. With payer and provider data residing within the common healthcare data model, organizations can determine the source of truth and assign trust rules. Collaborating with organizations, Clearsense establishes granular data access policies and assigns security controls. Accessible data can be seamlessly utilized in 1Clearsense analytics, outgoing integrations, and customized applications through 1Clearsense's bring-your-own-tool (BYOT) capabilities.

How Clearsense Helps

✓ Aggregate disparate data sources into the Clearsense Healthcare Data Model and bring transparency and consistency to the data.

✓ Facilitate cross-departmental collaboration on provider data so payers can reliably create business rules, define sources of truth and access policies, and ensure appropriate data usage.

✓ Continuously monitor changes to data and data quality to produce notifications and alerts, enabling payers and providers to take action on updating provider demographics, credentialing, network assignment, point of care alerts, and other critical information.

✓ Improve the accuracy of provider contracting, performance, and reimbursement.

✓ Enable API-based data sharing and integration in compliance with CMS 2026 Proposed Rule.

Benefits

Establishing a unified source of truth for provider data in 1Clearsense allows payers to:

Reduce manual intervention and duplicate efforts of staff to update disparate applications.

Increase speed and accuracy of claims adjudication and payment.

Improve network segmentation and empower strategic decisions on network growth.

Validate provider credentialing and attribution.

Boost care gap closure and provider performance reporting accuracy.

Get To Know Us

Committed to leading transformation in healthcare, Clearsense® creates a data journey, all the way from number to key insight. Cloud-based, AI-enabled, and HITRUST-certified, the platform of data solutions ensure data governance, implementation, and analytics are rapidly mainstreamed while remaining scalable and secure. Driving faster outcomes in clinical, financial, and operational environments, Clearsense is powering the innovation of tomorrow—right now.

The Clearsense Promise

Our Mission
Our mission is to unlock the full potential of healthcare data by delivering flexible solutions that empower data confidence and enable data-driven decision-making to achieve better outcomes.

Our Vision
We have created a holistic data environment with processes to cleanse, normalize, harmonize, and integrate better data with tools to make it more manageable, accessible, and valuable. We are unlocking the potential of data from patient care decisions, business operations, financial routines, and research.

Why Choose Clearsense?

One Platform, One Partner
One partner with an advanced end-to-end platform that empowers executives, business owners, clinicians, IT, and data scientists.

Data First Approach
Eliminates assumptions and replaces them with a single source of trusted data. Put trusted data into action without barriers or fear.

Healthcare Focused
We are 100% focused on the healthcare industry, which means we understand your data challenges and opportunities.

Security
Multi-cloud, HITRUST certified, HIPAA and SOC 2 compliant with SSO Integration. Role-based security controls at the application and data levels. We treat security with the highest level of importance.

Data Quality & Trustworthiness
Data governance advisory services wrapped around AI technologies and processes ensure the highest level of data trustworthiness.
