

FOR PROVIDERS

# Value-Based Care in Population Health

A variety of factors can contribute to the health of our population. These include people's lifestyles, their behaviors, & external factors such as the environment. To treat patients quicker and prevent illness, healthcare organizations combine clinical data with social determinants data to help planning, prioritization, & allocation of their resources more effectively. However, combining this dynamic data, visualizing it simply, and distributing access to individuals and teams across large organizations can be inefficient, complicated, and costly.

Clearsense addresses these issues by delivering distributed and powerful self-service population health analytics to everyone within an organization. The business and user-friendly technology and intuitive workflow help increase and track the pace of data-driven system change, empowering everyone in the organization to use their data to make local, connected, transparent, and evidence-based decisions.

## How Clearsense Helps

- ✓ Enable data insights and exploration to be easily distributed across single and multiple organizations.
- ✓ Provide homogeneous views of clinical, social, financial, demographic, genotypic, and geographical insights.
- ✓ Use semantic searching to identify and monitor targeted clinical populations of interest with or without any technical background.
- ✓ Capture, annotate, and share the most important parts of your findings, helping expedite decision-making.

## Benefits

- ✓ Enabled data insights and exploration to be easily distributed across single and multiple organizations.
- ✓ Easily identify targeted clinical populations of interest with or without any technical background.
- ✓ Capture, annotate, and share the most important parts of your findings, helping expedite decision-making.
- ✓ Track key disease markets for patient cohorts.
- ✓ Identify and evaluate the impact of new care models, unexpected variations, and outliers.

## The Clearsense Approach

1Clearsense, an all-in-one healthcare data platform, aggregates data from various sources and is powered by the Clearsense Healthcare Data Model. This model offers pre-built integrations and accelerators to rapidly implement connections, mapping, and data quality rules, ensuring data lineage and traceability. With payer and provider data residing within the common healthcare data model, organizations can determine the source of truth and assign trust rules. Collaborating with organizations, Clearsense establishes granular data access policies and assigns security controls. Accessible data can be seamlessly utilized in 1Clearsense analytics, outgoing integrations, and customized applications through 1Clearsense's bring-your-own-tool (BYOT) capabilities.

## Get To Know Us

Committed to leading transformation in healthcare, ClearSense® creates a data journey, all the way from number to key insight. Cloud-based, AI-enabled, and HITRUST-certified, the platform of data solutions ensure data governance, implementation, and analytics are rapidly mainstreamed while remaining scalable and secure. Driving faster outcomes in clinical, financial, and operational environments, ClearSense is powering the innovation of tomorrow—right now.

## The ClearSense Promise

### Our Mission

Our mission is to unlock the full potential of healthcare data by delivering flexible solutions that empower data confidence and enable data-driven decision-making to achieve better outcomes.

### Our Vision

We have created a holistic data environment with processes to cleanse, normalize, harmonize, and integrate better data with tools to make it more manageable, accessible, and valuable. We are unlocking the potential of data from patient care decisions, business operations, financial routines, and research.

## Why Choose ClearSense?

### One Platform, One Partner

One partner with an advanced end-to-end platform that empowers executives, business owners, clinicians, IT, and data scientists.

### Data First Approach

Eliminates assumptions and replaces them with a single source of trusted data. Put trusted data into action without barriers or fear.

### Healthcare Focused

We are 100% focused on the healthcare industry, which means we understand your data challenges and opportunities.

### Security

Multi-cloud, HITRUST certified, HIPAA and SOC 2 compliant with SSO Integration. Role-based security controls at the application and data levels. We treat security with the highest level of importance.

### Data Quality & Trustworthiness

Data governance advisory services wrapped around AI technologies and processes ensure the highest level of data trustworthiness.
